

Tips for landscapes

- Use largest no. pixel settings, I.e.highest resolution
 - Use highest quality mode (SHQ or HQ, High Quality or best)
- Set white balance for conditions
 - Sun for bright sunlight
 - Cloudy for cloud etc.
- Use smallest aperture light conditions allow (high F no. Such as 8) to ensure narrow depth of field
- Use tripod if available OR
- Fast shutter speed to avoid camera shake

Tips for landscapes

- Decide landscape or portrait
- Consider rule of thirds
- Frame picture, e.g. tree branches
- Focal point, e.g. human activity
- Decide best position
- Pre-composition
- Leading the way
- Morning light is best
